Fujitsu Semiconductor Europe says “Congratulations!”

Florian Kubala studied Computer Engineering and initially joined Fujitsu Semiconductor Europe (FSEU) for a 6 months' traineeship in the Microcontroller Software department. As he enjoyed the professional atmosphere and the good support from experienced colleagues, he didn't hesitate to write his diploma thesis at FSEU subsequently. The topic was "Development and Integration of an AUTOSAR Compliant Complex Device Driver". Once finished, Florian gladly started a permanent engineer position offered by FSEU. A few months later, the company says "Congratulations" to Florian for winning the Friedrich Dessauer award from the VDE Rhein-Main association.

"It was a great pleasure for me to receive this reputable award. My sincere thanks go to my FSEU supervisors and colleagues for their great support.", says Florian with a big smile.
